# Memorandum

TO : Director of Communications

DATE: 7 September 1966

FROM : Chief, Engineering Staff

SUBJECT: Engineering Staff Monthly Report for August 1966

Our Electronic/Wire Technician recruitment continues at a steady pace with three men EODing this month. Unfortunately, we had three technicians resign and had three positions reduced - two in [REDACTED] and one in [REDACTED] during this period. As of 31 August we have 274 technicians on board against 274 slots (260 on T/O plus 14 Development Complement). We will most likely be "over ceiling" in this specialty shortly. This should be a temporary situation until new positions are authorized for MAX or additional technician positions are established on the O/S T/O's. However, we will not be over ceiling for Panel N since we are short in the Electronic Engineer category. Incidentally, we are carrying [REDACTED] (all in sponsored college programs) against our ceiling statistics.

Arrangements are being made for twelve OC people to accompany the Agency recruiters when the latter interviews "on campus" in October/November.

The [REDACTED] shielded enclosure installations by [REDACTED] were underway this month. All enclosures for Western Europe procured FY-66 have been delivered from [REDACTED] and are in various stages of cargo booking, intransit, foreign customs, or on site awaiting completion of the parent room renovations. Scheduling of the [REDACTED] installation teams continues to be a "touch and go" process due to slippage in completions of renovations.
